

# Break Free: The Second Escape of Black America from the Democrat Plantation

For decades, the Democratic Party has held sway over the African American community. However, a growing number of Black Americans are beginning to question the party's commitment to their interests. In his provocative new book, "How Black America Can Make Its Second Escape From The Democrat Plantation," author Larry Elder argues that the Democratic Party is no longer the party of Black America.

## The Democrat Plantation

Elder argues that the Democratic Party has created a "plantation" mentality among Black Americans. He says that the party has used its control over social programs to keep Black Americans dependent on government assistance. He also argues that the party has used its control over the media to promote a negative image of Black Americans.

Elder's book is a wake-up call for Black Americans. He argues that they must break free from the Democrat plantation if they want to achieve true equality.

### **The Second Escape**

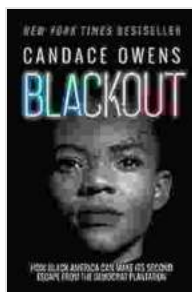

Elder believes that Black America is on the cusp of a second escape from the Democrat plantation. He points to the growing number of Black Americans who are becoming conservative and the increasing number of Black Americans who are running for office as Republicans.

Elder argues that the second escape will be different from the first escape. He says that the first escape was a physical escape from slavery. The second escape will be a mental escape from the Democrat plantation.

"How Black America Can Make Its Second Escape From The Democrat Plantation" is a must-read for any Black American who is concerned about the future of their community. Elder provides a powerful indictment of the Democratic Party and offers a hopeful vision for the future of Black America.
