Experience a New Era of Skin Rejuvenation

Prepare to embark on a transformative journey with Dr. Jerome Kaplan, a leading facial plastic surgeon renowned for his expertise in CO2 laser surgery. This cutting-edge technology offers an unparalleled solution for rejuvenating your skin, reducing wrinkles, and restoring a youthful glow.

Unveiling the Power of CO2 Laser Surgery

CO2 laser surgery harnesses the precision and efficacy of lasers to remove the outermost layers of damaged skin, revealing the underlying healthy tissues beneath. This process stimulates collagen production, promoting skin tightening, wrinkle reduction, and an overall improvement in texture and tone.

Dr. Kaplan's meticulous approach combines advanced technology with artistic finesse, ensuring optimal results tailored to your unique needs. The laser's wavelength is carefully adjusted to target specific areas of concern, addressing both superficial and deeper imperfections.

Transformative Benefits of CO2 Laser Surgery

- Reduces wrinkles and fine lines
- Tightens and firms skin
- Improves skin texture and tone
- Reduces sun damage and age spots
- Minimizes acne scars and stretch marks
- Enhances skin radiance and youthful appearance

The Kaplan Difference: Personalized Treatment Plans

Dr. Kaplan believes in a highly individualized approach to CO2 laser surgery. During your initial consultation, he will thoroughly assess your skin condition, identify problem areas, and develop a customized treatment plan that aligns with your goals and expectations.

Your treatment will be tailored to address your specific skin type and concerns, ensuring optimal outcomes and minimal downtime.

FAQs about CO2 Laser Surgery

What is the downtime associated with CO2 laser surgery?

Downtime varies depending on the extent of treatment, but typically ranges from 7-14 days.

Is the procedure painful?

Local anesthesia is administered to ensure your comfort during the procedure.

When can I expect to see results?

Initial results may be visible within a few weeks, but the full effects will continue to develop over several months.

How long do the results last?

The longevity of results depends on individual factors, but typically lasts for several years.
