Ikenberry and Slaughter argue that the United States has been a reluctant leader in international organizations because it has always been ambivalent about its role in the world. The United States is a powerful country, but it is also a country that has traditionally been suspicious of entangling alliances. As a result, the United States has often been reluctant to commit to international organizations and has often tried to use these organizations to advance its own narrow interests.

Despite its ambivalence, the United States has been an indispensable leader in international organizations. The United States is the world's largest economy and its most powerful military. As a result, the United States has the ability to shape the agendas of international organizations

and to influence their decisions. The United States has also been a major source of funding for international organizations.

Ikenberry and Slaughter argue that the United States' leadership in international organizations has been essential for global peace and prosperity. They show how international organizations have helped to resolve conflicts, promote economic development, and protect human rights. They also argue that international organizations have helped to make the United States a more secure and prosperous country.

*Say We Are Nations* is a timely and important book. It provides a much-needed historical perspective on the United States' role in international organizations. It also offers a clear-eyed assessment of the challenges and opportunities facing the United States in the 21st century.
