

Selected Papers from the Global Joint Conference on Industrial Engineering and Management: A Gateway to Innovation

In the rapidly evolving world of industry, innovation is paramount for driving success and staying ahead of the curve. The Global Joint Conference on Industrial Engineering and Management provides a platform for leading researchers and practitioners to exchange cutting-edge ideas and advancements in the field.

This captivating book, "Selected Papers from the Global Joint Conference on Industrial Engineering and Management," offers a comprehensive collection of peer-reviewed papers that showcase the latest advancements in:

Industrial Engineering in the Industry 4.0 Era: Selected papers from the Global Joint Conference on Industrial Engineering and Its Application Areas, GJCIE ... in Management and Industrial Engineering) by Bob Johnstone

DOWNLOAD E-BOOK

- Industrial Engineering
- Operations Management
- Supply Chain Management
- Engineering Management
- Human Factors Engineering
- Quality Management
- Data Analytics
- Artificial Intelligence
- Sustainability

Each chapter is meticulously crafted by renowned experts from academia and industry, providing invaluable insights into real-world challenges and innovative solutions. By delving into these pages, you will gain access to:

- Emerging trends and best practices in industrial engineering and management
- Case studies that demonstrate the practical applications of innovative techniques
- Thought-provoking ideas that will inspire new perspectives and drive innovation

Whether you are a seasoned professional, a researcher, or a student eager to explore the frontiers of industrial engineering, this book is an indispensable resource. It will empower you with the knowledge and

strategies to drive operational excellence, optimize supply chains, improve product quality, and enhance workplace productivity.

ICIEOM-ADINGOR-IISE-AIM-ASEM
International Joint Conference (IJC2017)

5 JULY | Universitat Politècnica de València
Valencia (Spain)

International Joint Conference 2017 (IJC2017)
"New Global Perspectives on Industrial Engineering and Management"

www.icieom.org

The Conference is a forum to disseminate, to all branches of academia and industry, information on the most recent and relevant research, theories and practices in Industrial Engineering and Operations Management.

The mission of the Conference is to promote links between researchers and practitioners from different areas of industrial engineering and management, in order to enhance an interdisciplinary perspective of the field. It will be a conference of very high standards, built on the experience of previous editions of IJO, ICIEOM and ISE conferences.

We are confident that the International Joint Conference 2017 will be a unique opportunity for networking, with a high quality scientific program and an exciting social program. We are looking forward to meeting you in Valencia (Spain) in 2017.

Objectives

The general objectives of the International Joint Conference (IJC2017) are:

- To promote networking between researchers, as a way to exchange ideas and approaches that contribute to the development of Industrial Engineering and Management from a scientific and entrepreneurial perspective.
- To present advances in industrial engineering and operations management, and their applications to companies.
- To maintain the level of excellence of previous conferences, and to ensure that their publications (proceedings, books and journals) continue to be the best reference in the field.
- To strengthen the national and international exchange relationships between investigators from recognized universities and research institutions.

The International Joint Conference (IJC2017) brings together:
ADINGOR (Asociación para el Desarrollo de la Ingeniería de Organización), ABERIO (Asociación Brasileira de Engenharia de Produção), IISE (Institute of Industrial and Systems Engineers), AIM (European Academy for Industrial Management) and ASEM (American Society for Engineering Management).

Testimonials

"This book is a veritable treasure trove of cutting-edge research in industrial engineering and management. The insights it offers are invaluable for

anyone looking to stay at the forefront of this rapidly changing field." - Dr. Jane Doe, Professor of Industrial Engineering, MIT

"As an industry practitioner, I find this book to be an indispensable guide. The case studies and practical examples provide actionable insights that I can implement immediately to drive operational improvements." - John Smith, CEO, Acme Corporation
