

Sensory Parenting: A Guide for the Elementary Years

Sensory processing disorder (SPD) is a condition that affects the way the brain processes sensory information. Children with SPD may have difficulty regulating their responses to sensory stimuli, such as touch, sound, light, smell, and taste. This can lead to a variety of challenges, such as difficulty paying attention, staying organized, and interacting with peers.

Sensory Parenting - The Elementary Years: School Years Are Easier when Your Child's Senses Are Happy!
